

PRODUCT INFORMATION

CADA OIL GOLDEN 10W-40 SPORT 4T

Semi synthetic motor oil for 4-stroke motorcycles

Golden 10W-40 Sport 4T is a semi synthetic engine oil without a friction modifier and has been especially developed for 4-stroke motorcycles.

This oil can also be applied in motorcycle transmissions where an API SG or SL is prescribed.

Golden 10W-40 Sport 4T is suitable for touring, racing and cross applications and contains a dedicated ester technology giving optimized friction characteristics and offers excellent protection against wear, deposits, sludge and oxidation under all conditions.

Golden 10W-40 Sport 4T has a low volatility, reducing oil thickening and oil consumption to a minimum. Due to the sophisticated formulation, this oil offers an excellent protection to gearboxes and wet disc clutches and prevents from slippery and sticking clutches.

Despite the high loads between the toothed faces, the special oil thickener hardly breaks down, so that even at high temperatures, the viscosity stays in grade to assure a strong lubricant film.

At low temperatures Golden 10W-40 Sport 4T rapidly provide a solid lubricant film for an optimum protection of the engine at cold starts.

PERFORMANCE
