

PRODUCT INFORMATION

CADA OIL GOLDEN 5W-40 SPORT 4T

Fully synthetic motor oil for 4-stroke motorcycles

Golden 5W-40 Sport 4T is a fully synthetic engine oil and contains a dedicated ester technology to provide extra protection against wear, deposits, sludge and oxidation under all conditions. This oil can also be used in motorcycle transmissions where an API SF, SG, SH, SJ or SL oil is prescribed.

Golden 5W-40 Sport 4T is suitable for touring, racing, as well as for cross applications, under all conditions.

Golden 5W-40 Sport 4T offers an excellent protection against wear, deposits, sludge and oxidation. Even under the most severe operating conditions air-absorption and foam building are minimised.

Golden 5W-40 Sport 4T has a very low volatility by which oil thickening and oil consumption are reduced to a minimum. Due to the special formulation, this oil offers excellent protection to gearboxes and wet disc clutches.

Even under the extreme conditions in gearboxes, the selected oil thickener will hardly break down so that at high temperatures the viscosity stays in grade to guarantee a solid lubricant film.

At low temperatures Golden 5W-40 Sport 4T rapidly provide a solid lubricant film for an optimum protection of the engine at cold starts.
